EXPERIENCE

FREEHAND.AI | Software Development Engineer
Jan 2026 – Present | Chennai, India

- Developed an **AI-powered rate card comparison engine** that summarized repriced rates, newly added entries, and key pricing changes between vendor revisions, reducing manual auditing effort and minimizing missed pricing discrepancies.
- Built an **AI-assisted rounding-weight pricing solution** for vendors with highly inconsistent pricing formats, addressing a costing gap impacting nearly **half a million** in transaction value for large enterprise customers.
- Re-architected the logistics costing platform to support both **unit-based** and **UOM-based** pricing models, redesigning rate-card ingestion, costing, and auditing while maintaining compatibility with existing vendor contracts.

CARATLANE – A TATA PRODUCT | Software Development Engineer II
April 2025 – Jan 2026 | Chennai, India

- Architected **event-driven microservices** using **Kafka** with retry and DLQ mechanisms for ERP transformation, building scalable order cancellation and inventory recovery modules.
- Revamped **order detail view** using **React.js, GraphQL, REST APIs** integrating KYC and seller incentive claims with a structured release plan for seamless deployment.
- Built a reusable **Saga Orchestrator** for **multi-step async workflows with rollback**, enhancing cross-service consistency via robust retry mechanisms.
- **Automated finance operations**, reducing manual effort from **9.8% to 1.2%** and improving auto procurement throughput.

CARATLANE – A TATA PRODUCT | Software Development Engineer I
June 2023 – March 2025 | Chennai, India

- Developed a **queue-driven notification service** for non-invoiced orders, orchestrating WhatsApp, SMS, and email reminders with peak throughput exceeding **50,000 notifications/day**.
- Developed a **delay reason upload pipeline** using **pre-signed S3 URLs**, triggering downstream delivery updates through **Kafka** for accurate ETA adjustments.
- Built a **React.js picklist dashboard** for barcode verification before invoicing, handling **20% of orders** and improving fulfillment accuracy.
- Built **item inwarding and vendor procurement workflows** with **99.9% intake accuracy**, improving inventory intake operations and ERP data consistency.
- Created **CL Connect**, a social gifting POC for wishlist sharing using **React.js** and **Node.js**.
- **Resolved a 2-year production bug** of duplicate barcodes per order by identifying and fixing a lagging Kafka message queue.
- **Optimized 500+ legacy Rails background processes**, improving query performance, memory usage, and Kafka consumer stability.

SUMMARY

Results-driven **Software Development Engineer** with **3+ years** of experience in **e-commerce and logistics** domains. Experienced in building scalable back-end systems using **Java** and **Node.js**, designing **event-driven microservices architectures** with **Kafka**, and delivering full-stack solutions with **React.js**. Contributed to **ERP transformation**, **system optimization**, and business-critical platforms spanning **order management**, **inventory operations**, and **AI-driven pricing intelligence**. Strong foundation in **distributed systems**, **system design**, and high-throughput applications.

EDUCATION

MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY
B.Tech – Computer Science & Engineering
May 2019 – May 2023 | Kolkata, West Bengal
CGPA: 9.14 / 10

SKILLS

Languages: Java, JavaScript, TypeScript, Python

Frameworks: Spring Boot, Spring Framework, Node.js, Express.js, React.js, GraphQL, REST APIs

Databases: MySQL, MongoDB, Redis, Elasticsearch

Messaging & Infra: Kafka, Webhooks, Microservices Architecture

Cloud & DevOps: AWS (S3, Lambda, CodePipeline, CloudWatch), Docker, Git, Linux, Postman, Rundeck

Concepts: System Design, Design Patterns, Event-Driven Architecture, Saga Pattern, Data Structures & Algorithms, Agile Methodology, AI Tools

ACHIEVEMENTS

Consistently rated **Exceeding Expectations** for **6 consecutive quarters** at CaratLane, receiving **3 Spot Awards** for outstanding contributions to critical projects and operational excellence.
